

Apporto vs VMware Horizon

The Better Choice for Virtual Desktops

Comparison Matrix

Apporto	VMware Horizon
Windows, Mac, or Linux Apporto is the only DaaS platform offering full Windows, MacOS, and Linux desktops, along with streaming apps.	Complex, heavy lift to serve full desktops. MacOS is not supported.
Fast and Easy App and Desktop Publishing Web-based admin console makes adding or updating apps and desktops a snap.	Complicated image and application preparation process. Can often take days to achieve optimal configuration.
Fully Managed Deployment Option The Apporto team handles all deployment tasks.	A lengthy and complex do-it-yourself process.
Security and Remote Access Apporto is built on a zero trust, least privilege security model.	Additional licensing and servers may be required. Subject to additional usage-based fees.
Integrated Two-Factor Authentication Security is a native component of the Apporto platform.	Not included. 3 rd -party solution required.
Seamless Integrations. Apporto provides seamless integration with cloud drives (Box, One Drive, and more) and all major Learning Management Systems (Education Edition)	Not available.
Easy Management Manage servers, users, groups, and applications from a single browser-based console.	More complex. Requires multiple consoles to learn and navigate.
Great User Experience Access apps and desktops from any browser-enabled device.	Launch apps separately within the Horizon client or deliver them within a shared desktop.
Access applications and desktops from any device with an HTML5 browser.	Horizon View client is recommended for the best experience.

<p>Scheduling The ability to set preferred access to applications or desktops for groups of users.</p>	Not available.
<p>Virtual Classroom (Education Edition) Apporto includes an interactive platform where instructors can view student sessions in real-time.</p>	Not available.
<p>Analytics System-wide and department/class specific analytics detailing usage, sessions, and user performance.</p>	Not available.
<p>Our subscription plans are based on concurrent users and include all features with no hidden fees.</p>	Available in multiple editions, with varying features and costs.

Why Choose Apporto?

Since its establishment in 2014, Apporto has established itself as a leader in secure virtual desktop technologies. With its comprehensive support for on-premise, cloud, and hybrid deployments, Apporto offers a versatile and cost-effective solution that outpaces traditional on-premise offerings from VMware, adapting seamlessly to the diverse needs of modern enterprises.

Apporto, now extending beyond its cloud-native roots, offers a seamless and superior user experience without the traditional complexities and costs associated with VDI solutions. This evolution allows your IT team to shift their focus from constant updates and maintenance of a complicated technology stack to more strategic projects and core business goals, whether your infrastructure is on-prem, in the cloud, or a hybrid of both.

Fully Managed Service: Apporto’s fully managed service offering means that, in essence, we become your dedicated support team. Customers can focus on the important tasks of keeping their business successful and confidently leave the ongoing monitoring and maintenance to us.

Advanced Security: Built using a zero-trust and least-privilege security architecture model, the Apporto platform stops bad actors at the perimeter. Using our advanced security filtering features, customers can limit access to their internal networks and data to just the right people.

Lowers Costs: Apporto, initially cloud-native, now extends its cost-efficiency to on-premise and hybrid environments. Our team is dedicated to optimizing infrastructure costs, whether in the cloud, on-site, or a blend of both, ensuring our customers benefit from low and predictable fees across all deployment models.

Easy to Use and Manage: Apporto’s browser-based access for users and admins makes everything a simple click away. Users can easily connect and use the apps or a full desktop that has been assigned to them and admins can handle the lightweight management tasks from any

device. There is never a client to install and no special permissions are needed. Users just log in and start enjoying the platform.

A Great User Experience: The Apporto platform is all about a great user experience. Developed to provide a near-native experience, users will enjoy the powerful performance of our solution, the ease of use, persistent profiles to maintain personalization, access to cloud storage, our white glove customer service, and so much more.
